

“ The EHS+ Center is expanding its scope through expertise across various environments, health and safety initiatives. This is a very good service help from ISC and the EHS+ Center to its clients. ”

– Deepak Mugadaur (Corporate EHS Advisor)

## India: Environment, Health & Safety Training

**EHS+ CENTER**  
ADVANCED TRAINING. INSPIRING CHANGE.

### Overview

- In a strategic partnership with Symbiosis Institute for International Business, the EHS+ Center is offering factory-level trainings, customized to a variety of industries, to move industry standards from basic EHS compliance to more proactive and holistically sustainable practices.
- Focused on serving a variety of sectors such as textile, construction, automotive, and chemicals/pharmaceuticals, the trainings offered by the EHS+ Center in Pune help to foster a culture of safety in Indian factories, improve environmental sustainability, and support key Indian initiatives such as *Make in India* and *Clean India Mission*.
- Trainings provide the industry-specific skill sets and expertise managers and factory workers need to improve health and operational safety, and increase energy efficiency in the workplace.
- The EHS+ Center offers tailored curricula that can be delivered at factory sites or at our Center in order to meet the customized needs of companies and their supply chains.

Foundation

## Institutional Partners

- Nanjing University School of the Environment (*China*)
- North South University (*Bangladesh*)
- Symbiosis Institute for International Business (*India*)

## About ISC

Since 1991, the Institute for Sustainable Communities (ISC) has led more than 115 transformative community-driven sustainability projects in 30 countries including the United States, China, India, and Bangladesh. ISC helps unleash the existing power of local people and institutions to address immediate social, economic, and environmental challenges and opportunities – all while building those on-the-ground solutions into national and international best practices and policy. At the heart of the organization's approach is results-focused, authentic, and pragmatic engagement with all stakeholders, which unearths locally-driven and equitable solutions to the biggest challenge we face – global climate change.

# EHS+ NETWORK

ADVANCED TRAINING. INSPIRING CHANGE.

The EHS+ Network is a global partnership connecting ISC's EHS+ Centers in China, Bangladesh and India. Each EHS+ Center trains factory managers with the technical skills and management expertise to address EHS priorities. Through the EHS+ Network, these trained practitioners interact and collaborate, share and apply ideas on improving the sustainability of supply chains throughout Asia.
